**Ensure Legislative
Compliance**

Much More Than Maintenance

In the face of escalating energy costs, uncontrolled consumption, and the pressing imperative to achieve net zero targets amid regulatory pressures, businesses in every sector are seeking solutions to manage their energy concerns.

Westbury FM embraces a data-driven approach to simplify the complexities of energy and property management. From initial data collection to ongoing strategic advice, our user-friendly dashboards and comprehensive reports delivering insightful data and advice, empowering you to understand your site's performance, conduct cost reviews, and identify opportunities to enhance your estate's efficiency.

Because we are specialists in property maintenance services, we possess the skills and solutions necessary to expedite improvements to your buildings and energy consumption too. With customers saving up to £8 for every £1 invested in this solution Westbury FM are your partners for much more than maintenance.

About Westbury FM

Westbury FM is a specialist provider of property maintenance services to clients and facilities providers across central London and the home counties.

Taking a service-led, technology enabled approach we excel in caring for and maintaining buildings, putting the needs of our customer first.

Insightful Data to Power Your Business

Bespoke reports and intelligent dashboards provide powerful data to inform your business strategies. Examples include (Left to Right) M&V of energy saving interventions, Multi-site property dashboard, Energy Heat Map by date and time.

What We Do

Delivered by our team of energy and data experts we make the steps to collect and use your energy data easy:

1. COLLATE

Source your energy data from main and sub-meters, building assets, sensors, weather and other operational variables.

2. VISUALISE

Benchmark the performance of your estate and conduct cost analysis via user friendly dashboards and reports.

3. IMPLEMENT

Design and deliver strategic solutions including LED lighting and EV charging, driving cost savings and compliance.
